DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of species 1 in the reply filed on January 26, 2007 is acknowledged. The traversal is on the ground(s) that the species are related and the inventions have a similar field of search. This is not found persuasive because the only proper traversal of a species requirement is an admission that the species are obvious variants of one another

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 8, 9, 14, 15 and 20 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Hellat et al (USPN 6,546,729).

Hellat et al discloses a gas turbine system having a compressor (10), a turbine (9), an annular combustor (8) having a front plate (2) with plural premixers (5) through it and plural adjustable damping tubes (7). The system operates by determining the oscillation behavior or excitation frequency (col. 4 line 58) of the combustor and then

adjusting the frequency from the tubes (note the sentence spanning cols. 4 and 5).
Further, dampers are designed as set forth in claims 8, 14 and 20 (note the last paragraph of col. 5).

Allowable Subject Matter

Claims 2, 3, 10 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. lasillo et al discloses a combustion system with an acoustic damper.
